## Work

### Co-Founder

**Immortal Hosting**

Sep 2025 – Present

Founded and developed game server hosting solutions from the ground up. Built production-grade infrastructure using 3-node KVM and Docker cluster with enterprise-level servers. Implemented in-house DDoS mitigation technology, comprehensive monitoring, and intrusion detection systems. Manage all aspects of business operations including customer service, technical support, and infrastructure maintenance.

### Cyber Security Analyst

**N'ware Technologies**

May 2025 – Present

Conduct security assessments and penetration testing engagements. Analyze security vulnerabilities and provide remediation recommendations. Collaborate with team to enhance client security postures and implement defensive strategies.

### IT Technician

**Cégep de Saint-Hyacinthe**

Dec 2024 – May 2025

CAPTIC - Centre d'aide pédagogique sur les technologies de l'information.

Provided comprehensive technical support to students, teachers and staff across the institution. Troubleshoot hardware and software issues, maintained computer lab infrastructure, and assisted users with various technology-related troubleshooting challenges.

## Education

### Université de Sherbrooke

Bachelor of Science in Cyber Security Specialization

Aug 2025 – Present

### Cégep de Saint-Hyacinthe

Diploma of College Studies (DEC) in Réseaux et cybersécurité

Aug 2023 – Jun 2025

## Projects

### Prod Homelab

3-node KVM and Docker cluster powering Immortal Hosting. Enterprise servers with in-house DDoS mitigation, open-source infrastructure, and comprehensive monitoring.

### Immortal Hosting
